Eastar Chemical Corp partners with D. H. Gold Associates Inc. on regulatory services for the Chinese market.

September 1, 2009 - Sacramento, California USA:

Eastar Chemical Corporation (Sacramento, CA) announces the partnership with D. H. Gold Associates Inc. (Paramus, NJ) to provide regulatory services to Chinese chemical and pharmaceutical producers.

Eastar has managed supply chain of custom made specialty chemical and pharmaceutical fine chemical from China to western customers for over 25 years. During this time, Eastar has closely worked with D.H. Gold Associates in training its internal Quality Assurance and Control team, management team, affiliated plants and supply partners in China. Over the past decade, D.H. Gold Associates has routinely assisted Eastar teams on cGMP compliance and FDA related matters.

Chinese chemical and pharmaceutical producers have over the years played an increasingly more important role in the global supply chain. As they gain importance and as the number of Chinese producers looking for global opportunities increase, there is an increasing and urgent need to avoid and reduce supply risks through regulatory compliance. With recent quality problems in China, the US FDA and Chinese SFDA have placed more focus in this area. Eastar and D.H. Gold Associates will serve an important role to guide and assist Chinese producers in the understanding and compliance of international regulatory requirements. The partnership will create sustainable value to its customers and partners.

“Dan and his team have in depth knowledge and experience in regulatory guidance and implementing compliance. They have a history of working with our team in China to assist our Chinese affiliates and supply partners. Their track record and experience with our team has produced numerous success stories in adding value to our customers and partners. We work forward to working with Dan and his team on future projects in this partnership,” said Tony Chu, President of Eastar Chemical Corporation.

D. H. Gold Associates, Inc. is a New Jersey headquartered company led by Daniel H. Gold, Ph.D., former Sr. Director, Quality Services for Lederle Labs and more recently Vice President Quality Assurance for Par Pharmaceutical. Based upon their hands-on, multifaceted experience skills, DHG Associates provides a broad range of technical and regulatory services to the pharmaceutical industry. The comprehensive experience base of the DHG Associates team encompasses active drug substances, biologics, oral, topical and parenteral dosage forms.
